All prints are printed on lightweight sheets of aluminum for the fullest, richest experience. Printed on aluminum instead of paper, the photographs contain a richness and

depth that prints on photo papers simply cannot match. Nighttime photos particularly shine as metal prints. The shadows remain deep and rich, and the highlights pop. Aluminum

prints are lightweight and come ready to hang. Below are a couple different hanging and framing options.

Float Hangars

Float Hangars are the economical way to hang your photographs. These come on the back of the print and are equipped with saw teeth for hanging, and rubber feet at each corner. They hold your image about 1/2 inch from the wall.

Float Hangar Pricing

Prices include shipping to you. If you are purchasing in California, prices include sales tax. Subtract \$5-\$10 if you want no hangar (size-dependent).

8X10	\$95	16x20	\$215	<i>Sizes 16x20 and up have extra support and wire hanging hardware built in</i>
8x12	\$100	16x24	\$240	
11x14	\$130	20x20	\$250	
12x12	\$140	20x24	\$260	
12x18	\$185	24x24	\$285	
16x16	\$175			

Float Hangars

Float Frames

A frame sets an image apart. With a Float Frame, your metal print floats within a slim, sleek frame, mounted with about 1/4 inch of space between your photograph and the frame itself. Frames can be White or Black, and will be Black if not specified (which I think looks best).

Float Frame Pricing

Prices include shipping to you. If you are purchasing in California, prices include sales tax.

8X10	\$160	16x20	\$295
8x12	\$170	16x24	\$330
11x14	\$215	20x20	\$335
12x18	\$255	20x24	\$355
16x16	\$255		

Float Frame

Odd-Sized Images

Panoramas and some other images of mine are not standard shapes, and their prices will vary depending on the size you would like. For those, tell me what you want, and we'll work out the price.
